

PUBLIC HEALTH AND AI

A look at current applications

Event Details

Date:
April 10th, 2026

Time:
1:00 PM

Location:
<https://miami.zoom.us/s/94643028140>

Join us for a dynamic symposium exploring the transformative potential of Artificial Intelligence in revolutionizing public health. Engage with leading experts, researchers, and policymakers as we delve into cutting-edge applications of AI to address critical public health challenges.

Key Topics:

- Disease prediction and prevention
- AI-driven personalized medicine
- Improving healthcare access and equity
- Data privacy and ethical considerations
